LIZA MOSKALENKO

Senior Frontend Engineer · Vue 3 / TypeScript · AI-driven development

Valencia, Spain | limoskk.social@gmail.com | linkedin.com/in/limoskk | limoskk.work

SUMMARY

Senior Frontend Engineer with 6+ years of experience building and scaling customer-facing products across healthcare, telecom, and ed-tech. Deep expertise in Vue 3 and TypeScript, including incremental modernization of legacy Vue 2 and AngularJS codebases. Strong in frontend architecture, performance optimization, design systems, and automated testing for interactive, accessible UIs. Hands-on experience with Python and Django, alongside end-to-end product delivery across frontend and backend integration. Daily use of AI coding agents, including Claude Code and custom agents, hooks, and skills, for implementation, refactoring, code review, and documentation. Experienced in CI/CD setup and automated E2E testing across critical repositories. Mentor engineers and collaborate closely with product, design, and engineering teams.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), Python, Java, HTML5, CSS3
Frontend	Vue 3 (Composition API), React, Next.js (SSR/SSG), Redux, TanStack Query, single-spa micro-frontends, design systems, responsive and accessible UI
Backend & data	Django, Flask, Node.js, REST APIs, GraphQL, PostgreSQL, NoSQL
Styling	CSS-in-JS (styled-components), SASS, Material UI
Testing	Unit, component, integration and end-to-end (E2E) testing; Vitest, Playwright, Cypress, Jest
DevOps & tools	CI/CD pipeline setup, monorepos, Vite, Webpack, shared packages, AWS (Lambda, S3), Git
AI in practice	Daily use of Claude Code and custom AI agents for implementation, code review, refactoring and documentation
Ways of working	End-to-end ownership, technical decision-making, code review, Agile/Scrum, cross-functional collaboration

EXPERIENCE

Senior Frontend Engineer — ZAVA (part of Hims & Hers Health)

May 2024 – Present

Customer-facing healthcare platform

- Own frontend architecture and delivery for customer-facing micro-frontends in a shared TypeScript monorepo, serving **250,000+ users monthly**; translate product requirements into maintainable, production-ready solutions.
- Designed and launched a product selection page in a critical customer onboarding funnel, driving a **6% increase in monthly service revenue**.
- Modernized legacy Vue 2 and AngularJS services by migrating them to Vue 3 and TypeScript, and designed a new frontend architecture that delivered a 15% conversion uplift in an A/B test while preserving existing customer journeys.
- Co-created a company-wide design system with UI/UX designers and frontend engineers, shipping shared component packages that improved UI consistency, development velocity and maintainability across products.
- Introduced a translation-management process and Node.js CLI library adopted by every engineering squad and embedded in the standard development workflow.
- Reduced overall page load time by **20%** through performance analysis, bottleneck investigation and asset-inlining strategies.
- Set up CI/CD pipelines and automated end-to-end checks across several critical repositories, improving repeatability of release validation and regression testing for important user journeys.
- Created 10+ custom AI coding agents and reusable skills to support feature implementation, large-scale refactoring, code review, and documentation; mentored junior and mid-level engineers on code quality and architecture.

Stack: TypeScript, Vue 3, React, TanStack Query, single-spa, Node.js, Vitest, Playwright, Cypress, CSS-in-JS, SASS, Vite, AWS, CI/CD

Frontend Developer — STC Ltd.

June 2022 – April 2024

- Introduced server-side rendering with Next.js and improved resource usage to strengthen scalability and content delivery.
- Moved heavy business logic into Web Workers, increasing processing speed by **30–40%**.
- Worked across the stack, building and integrating Node.js services alongside the React frontend.
- Partnered with UI/UX designers on a full redesign, delivering responsive, pixel-perfect interfaces across devices.

Stack: TypeScript, React, Next.js, Redux, Node.js, Python, SASS, Material UI, Webpack, Jest, Playwright

Software Engineer — Netcracker Technology

Sep 2021 – May 2022

- Raised unit and integration test coverage from **20% to 60%**, strengthening regression detection and reducing production errors.
- Built an internal library for collecting Kubernetes statistics and managing clusters, increasing reuse across teams.

Stack: Golang, Fiber, Java, Spring, Kubernetes, Jenkins, Postman

Frontend Developer — Saint Petersburg Electrotechnical University

Apr 2020 – Nov 2020

- Built a library of dynamic UI components that adapt to different user roles and permissions, which decreased engineering efforts per task by 30%

Stack: React, Redux, TypeScript, HTML, CSS, Python, Django

EDUCATION & CERTIFICATIONS

Saint Petersburg Electrotechnical University — BSc, Computer Software Engineering — 2019 – 2023

ITMO University — UI/UX Design certification — 2023 – 2024

Netcracker Technology — Educational Center, Software Development — Sep – Dec 2021

Dell Technologies — Mentoring programme for students — Feb – May 2021
