Summary

Frontend Engineer with 5+ years hands-on experience across healthcare, telecom, and education domains, delivering robust and scalable web applications tailored to real-world user needs. Skilled in modern JavaScript ecosystems (Vue 3, React, TypeScript) and micro-frontend architecture, with a focus on performance and clean code. Proactive and strong cross-functional collaborator, comfortable working across product, design, and engineering to drive impactful solutions.

Experience

Senior Frontend Engineer May 2024– Present

ZAVA (part of Hims & Hers Health)

- Led the development of micro-frontends from conception to production, that serve over 150.000 users monthly
- Collaborated with UI/UX designers and frontend engineers to implement a new company-wide design system, significantly improving consistency, development velocity, and maintainability across multiple products
- Engineered a modern document generation pipeline utilizing AWS Lambdas and Puppeteer, replacing an outdated system with a faster, more scalable, and technologically advanced solution
- Implemented the Product selection micro-frontends (both admin and client-facing) - from architecture to code - which led to increasing conversion in the UK up to 15%
- Designed and introduced new translations management process, including CLI library, which significantly improved development culture across all engineering squads
- Optimized website performance by implementing asset inlining strategies, analyzing bottlenecks and reducing overall site loading time by 20%, enhancing user experience

Technologies: TypeScript, Vue 3, React, TanStack, single-spa, Vitest, Playwright, SASS, Vite, AWS

Frontend Developer June 2022 – April 2024

STC Ltd.

- Introduced server-side rendering and efficient resource usage, enhancing scalability and optimizing website content
- Introduced the Web Workers in the project which increased the speed of business logic by 30-40%
- Collaborated with UI/UX team and migrated to a new design, following a pixel-perfect practice and resulting in a modernized and cohesive user experience

Technologies: TypeScript, React, Redux, Next.js, HTML5, SASS, Material UI, Webpack, Jest, Playwright, Node.js

Software Engineer September 2021 – May 2022

Netcracker Technology

- Increased code coverage with unit and integration tests from 20% to 60% reducing the number of errors
- Developed an internal library for collecting statistics from Kubernetes and cluster management which increased code reusability

Technologies: Golang, Fiber, Java, Spring Framework, Kubernetes, Jenkins, Postman

Frontend Developer April 2020 – November 2020

Saint-Petersburg Electrotechnical University

- Implemented a library with dynamic UI components that adapt to various user roles

Technologies: React, Redux, TypeScript, HTML, CSS

Education

ITMO university
UI/UX design certification *2023 – 2024*

Saint Petersburg Electrotechnical University
Bachelor of Computer Software Engineering *2019 – 2023*

Netcracker Technology
Educational center, Software Development *Sep 2021 – Dec 2021*

Dell Technologies
Mentoring program for students *Feb 2021 – May 2021*
